

PROGRAM SPECIFIC OUTCOME– M.Sc. BIOTECHNOLOGY

2020-2021

Program Specific Outcome (PSO) – M.Sc. Biotechnology

PSO1- Ability to identify an area of scientific research, design and carry out suitable experiments and document the results in a scientific manner.

PSO2- Understand complex phenomenon in Life sciences and techniques in Biotechnology and apply this knowledge to understand the current scientific questions and find out the solution of complex scientific problems.

PSO3- Effectively communicate complex scientific concepts and his/her research to scientific community and general public.

PSO4- Demonstrate the ability to skillfully in handle the laboratory equipment and perform experiments in very controlled and systematic manner while taking care of instruments.

PSO5- Develop the capacity of critical thinking and problem-solving aptitude by virtue of taking research projects
