

**PROGRAM SPECIFIC OUTCOME– M.Sc. BIOCHEMISTRY**

**2020-2021**

**Program Specific Outcome (PSO) – M.Sc. -Biochemistry**

**PSO1- Understand the structure and the mechanism of metabolism of macromolecules and the regulation and disorders in metabolic pathways.**

**PSO2- Develop analytical and Cognitive skills in Biochemistry that allow independent exploration of biological science through research methods.**

**PSO3- Demonstrate a comprehensive understanding of chemical and biological structure, principles, techniques and its applications.**

**PSO4- Develop linkages between scientific community and society to build trust, partnership and responsibility of science towards achieving social goals.**

**PSO5- Ability to describe the biochemical basis of diseases, regulation of metabolic pathways and gene expression regulation**

**ATTESTED**
