ATTESTED

Principal

Maharani Lakshmi Ammanni College
for Women, Autonomous
Science Post, Bangalore - 560 012.

Goals

The study of history is an important component of a meaningful and comprehensive liberal arts education. As such History provides a unique opportunity for students to understand how the past informs our understanding of the present. The History paper offered at MLACW encompasses a series of papers in line with the Bangalore University syllabus that examine human dynamics, over time, from a disciplinary and interdisciplinary perspective. In addition to focusing on content, the paper develops and enhances discipline specific skills that will serve in any future endeavors.

Objectives

The student will be able to:

1. Define, explore, and explain major historical problems
2. Develop research skills required to investigate those problems fully
3. Employ critical methods to analyze those problems
4. Prepare formal papers and presentations that reflect research, critical analysis, and layered literacy's that follow disciplinary conventions
5. Engage in collaborative scholarship
6. Hands on experience through field trips

Program Outcome:

Apart from understanding the evolution of humanity, with these skills in hand, the student will be in a position to compete for admission into a variety of fields, including post graduate study and entry into law schools.

Program Specific Outcome:

The course will also prepare the students for careers in the public and private sectors. These include education, the teaching, tourism, travel trade, museum profession, library science and community or Foreign Service, NGO and INGO sector, Human Rights institutions, hospitality sector, women development etc.

ATTESTED

Principal
Maharani Lakshmi Ammanni College
for Women, Autonomous
Science Post, Bangalore - 560 012.

Program Outcome:

- The HES course offered at MLAC is a three-year course which provides the students a greater insight into the world helping them understand both the past as well as the future fostering a sense of empathy. The course is designed to enable students to interpret the current economic and social challenges facing the country. It improves the social skills of students and helps them understand the impact of science, technology and medicine. Students will be able to forecast the future course of changes and development through their knowledge of policies and programmes set by the governments and other development agencies.

Program Specific Outcome:

- Through organizing guest lectures, workshops, seminars, industrial visit and extension activities, students will be able to learn the subject matter comprehensively, particularly its applications and foster the development of their own skills.
- Students will be able to pinpoint and understand the past, present economic conditions of the country.
- The Students will be equipped with relevant knowledge based on economic principles including market functions and structures, efficiency in manpower and resource management , need of credit/finance for initiating and accelerating projects.

Career Prospects :

- The curriculum prepares the students for some of the most popular career options in the field of Industry, Management, Consulting, Law, Teaching and many branches of public services including civil services.
- Other career paths – actuarial sciences, finance, IES, Rural Development & Public policy. Career as historian, archival works.

I SEMESTER B.A. ECONOMICS

Eco-1: Micro-Economics

Objective: Develop the foundations of analytical methods used in micro economics.

Skills to be developed: basics of consumer behaviour, behaviour of companies and markets.

Outcome: Inculcating knowledge to the students that economics is about the allocation of scarce resources among the various uses.

<i>Total Number Of Hours</i>	Credits	Hours/Week	Internal Assessment Marks	End Semester Exam	Total Marks
<i>52</i>	3	4	50	100	150

Module – 1 – Theory of Consumer Behaviour

Meaning, nature and scope of micro economics – limitations and uses – utility analysis – Law of diminishing marginal utility – Law of equi – marginal utility – Consumers surplus – Cardinal and Ordinal utility analysis – Indifference curve analysis – Properties, Price line, Consumers equilibrium, Price effect.

-
- Total 10 Hours

Module – 2 – Theories of Demand and Supply

Law of Demand – Exceptions – Shifts in Demand – Determinants of Demand – Elasticity of Demand – Types – measurement of price elasticity of Demand – Factors determining elasticity of Demand. Law of Supply – Changes in supply – Factors determining supply

- Total 12 hours

Module – 3 – Theory of Production

Production function – Law of Variable proportions, Laws of returns to scale, Economies of Scale, Iso-quants and Iso-cost curves – Producers equilibrium.

Cost of Production – Cost concepts – Cost function in short run and long run – Revenue concepts – Marginal average and total Revenue.

- Total 10 hours.

Module – 4 – Theory of Product Pricing – Market Structure

Perfect competition – Features – Price output determination. Monopoly – Features – Price output determination – Price discrimination – Monopolistic competition – Features – Price output determination – Oligopoly – Features – Price output determination – Duopoly – Features.

- Total 10 hours

Module – 5 – Theory of Factor Pricing

Marginal productivity theory of distribution – Concept of rent – Ricardian theory of rent – Quasi rent and transfer earnings – Wages – Real and Nominal wages – Collective bargaining theory of wages. Interest – Classical and Liquidity preference theory of Interest – Profit – Risk bearing, uncertainty, dynamic and innovation theories of profit.

Skill development:

- a. Illustrate the Law of DMU and Law of EMU with an example of your choice.
- b. Calculate consumer surplus for the following –

Units bought –	1	2	3	4
Price in Rs.	40	40	40	40
Total utility	80	75	60	40
- c. Visit a vegetable market in your locality and write about the changes in the level of price and demand for a particular commodity over a week.
- d. Measurement of Price elasticity of demand with examples.
